

Supporting farmers and ranchers impacted by disabilities or healthcare conditions

The vision of Nebraska AgrAbility is to enhance the quality of life for farmers and ranchers with disabilities or health conditions so that they, their families and their communities continue to succeed in rural America. Nebraska AgrAbility is a partnership of **University of Nebraska-Lincoln Extension** and **Easterseals Nebraska**. Since 1995, Nebraska Extension and Easterseals have focused on service to disabled farmers and ranchers.

For those farmers and ranchers who have income from agriculture, AgrAbility equips them to maintain their chosen profession in production agriculture. Nebraska AgrAbility team members work with community professionals to provide the following supports:

- Modify farm and ranch tasks
- Adapt equipment
- Educate on injury prevention
- Provide financial guidance
- Identify funding resources (for assistive technology)
- Coordinate community services
- Increase farmstead accessibility
