

About Certified Piedmontese...

Certified Piedmontese is a healthy beef choice that doesn't sacrifice flavor or tenderness. Our cattle, which are raised responsibly and carefully on family ranches across the Midwest, are healthier, too. They're never given antibiotics, steroids, or hormones. We raise the rare Piedmontese breed through a ranch-to-fork approach that ensures traceability, environmental sustainability, humane animal handling, and responsible resource management at every step.

The Piedmontese breed, prized for its noticeably heavy musculature, has a unique genetic makeup means these cattle naturally develop a significantly greater muscle mass compared to conventional cattle. At the same time, muscle fibers remain tender without the need for excess marbling. The result? Consistently superior beef that's both lean and tender.
