

Nebraska Cattlemen State Political Action Committee

(NC State PAC) helps ensure the interests of beef producers are enhanced in Nebraska. The aim of the NC State PAC is to support candidates who champion the beef industry by making decisions about laws and regulations that enhance the business climate for profitable beef production in Nebraska and foster opportunities for expansion.

WHY GIVE NOW?

There has not been a more important time than now for the beef industry to be politically engaged. As the urban population steadily grows in Nebraska, beef producers will continue to face challenges in the state legislature. Property taxes continue to rise, regulatory burdens are increasing, and there are more barriers to operating businesses. Funds raised by the NC State PAC allow Nebraska's beef producers to have their voices heard by state legislators and government officials.

If we are not engaged and actively participating in the political process, the only other option for cattlemen is to watch from the sidelines as special interests groups work to interfere with Nebraska becoming the beef epicenter of the world.
